

Product Specifications

H03VV-F Power Cable

Description

- Conductor: Bare or tinned, stranded copper conductor
- Insulation: Lead free PVC
- Jacket: Lead free PVC
- Reference standard: GB5023.5-97

Electrical characteristics

- Rated voltage: 300/300V
- Rated temperature: 70°C
- Test voltage: 2000V(5min)

Applications

- Flexible cable (H03VV-F) for dry areas, for applications requiring special flexibility without any mechanical sensitivity.
- Allow the gap to bend and twist. Especially suitable for small equipment with low mechanical load and for connecting light household equipment
